Attachments: EPA issues response to petition on ocean acidification

Hi Lindsay—I'm not sure who from EPA is asking, but Ecology is NOT working on OA criteria as an individual state. Given the nationwide significance of OA criteria, we requested from EPA several years back that they take it on as national criteria development. As you can see from the attached email, this is not currently on EPA's list of priorities to develop.

In the meantime, we do have staff scientists working with EPA, NOAA Fisheries, and other west coast states to contribute science to what could eventually be used to back up OA criteria (and in reality I'm guessing it is years off from being formally recommended by EPA as a national criteria).

I believe Michael Cox is the Region 10 contact for OA, and we have also worked with Jill Fullagar who has been tracking OA issues. So, you might want to talk to them about EPA's role in all of this.

Thanks--Susan

Hi Chad,

I don't think we really talked about ocean acidification criteria development, but I'm getting asked by some EPA folks if Ecology is planning on working on criteria in the next year or two. And if you are planning on it, if any pre-work support from EPA is needed. Any indications? Thanks.
